For Immediate Release

Sierra-Olympic's High-Resolution, Low-Cost Thermal Camera with GigE Vision® and Power over Ethernet

- Affordable, new feature-rich thermal imager comes with 2-year warranty.

HOOD RIVER, OR – January 23, 2017 – Sierra-Olympic Technologies, supplier of infrared (IR) and thermal imaging components, cameras, and systems solutions for innovative imaging applications, introduces the **Viento-G**, an easy-to-use, affordable thermal camera. The feature-rich thermal imager is designed for use in a wide range of thermal monitoring applications. It offers the user the ability to view video, supply power, and control the camera with ease, using a single, standard Ethernet cable via GigE Vision® and Power over Ethernet (PoE) industry standards. The new camera will be premiered at SPIE's Photonics West in booth # 6027, at Moscone Center, San Francisco, Jan. 31 - Feb. 2, 2017.

The new Viento-G is ideal for custom OEM applications and other imaging tasks that require high reliability, excellent resolution, and affordability. It is available in two configurations: enclosed and split board. There are two types of imaging and data, either standard or thermography, and two resolution options: 320 x 240 or 640 x 480. This thermal camera comes with a variety of lenses and an industry-leading 2-year warranty. For more information about the unique Viento-G thermal camera with GigE Vision and PoE, please go to: <http://info.sierraolympic.com/viento-g-comingsoon>.

The company recently released a true HD thermal camera, the Viento HD Lab. Both cameras will be showcased at Sierra-Olympic's Photonics West booth # 6027 in San Francisco. Please stop by for a live demo.
